Forgotten Books, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Dewey Square Comprehensive Transportation Systems Management Program: Draft Environmental Assessment, Transportation Analysis, July, 1984 Use of the area s surface street system as a bypass route for traffic attempting to avoid congestion on the Central Artery. Heavy bus and truck volumes that are forced to compete with both local and regional traffic on area streets. Very heavy pedestrian volumes and a general public disregard of designated crosswalks and signal phases. A prohibition against trucks carrying dangerous cargos throughout the Central Artery s Dewey Square Tunnel requires they be accommodated on several local streets. The problems listed above result in a very inefficient roadway system which is particularly apparent during the peak commuter periods. Future Improvements This study identified two improvement options to meet the soils of the Study. Alternative A provides for an improved roadway configuration which generally includes the following: Alternative A resignation of Atlantic Avenue and Lincoln Streets as one-way northbound while South street and (purchase street) would become one-way southbound. All southbound traffic would be eliminated on Atlantic Avenue and all northbound traffic on Surface Artery would similarly be eliminated. High Street would remain one way northbound as it is today. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
