

Internet Governance and the Domain Name System: Issues for Congress CRS Reports

By Congressional Research Service

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 30 pages. Dimensions: 11.0in. x 8.5in. x 0.1in. The Internet is often described as a network of networks because it is not a single physical entity, but hundreds of thousands of interconnected networks linking hundreds of millions of computers around the world. As such, the Internet is international, decentralized, and comprised of networks and infrastructure largely owned and operated by private sector entities. As the Internet grows and becomes more pervasive in all aspects of modern society, the question of how it should be governed becomes more pressing. Currently, an important aspect of the Internet is governed by a private sector, international organization called the Internet Corporation for Assigned Names and Numbers (ICANN), which manages and oversees some of the critical technical underpinnings of the Internet such as the domain name system and Internet Protocol (IP) addressing. ICANN makes its policy decisions using a multistakeholder model of governance, in which a bottom-up collaborative process is open to all constituencies of Internet stakeholders. National governments have recognized an increasing stake in ICANN policy decisions, especially in cases where Internet policy intersects with national laws addressing such issues as intellectual...
