*This book will be worth getting. Better than never, though I am quite late in starting to read this one. It has been written in an extremely basic way which is only right after I finished reading this book through which actually altered me, alter the way I believe.*

Yale University Press, United States, 2018. Paperback. Condition: New. Reprint. Language: English . Brand New Book. Covering 13.8 billion years in some 100 pages, a calculatedly concise, wryly intelligent history of everything, from the Big Bang to the advent of human civilization With wonder, wit, and flair-and in record time and space-geophysicist David Bercovici explains how everything came to be everywhere, from the creation of stars and galaxies to the formation of Earth s atmosphere and oceans, to the origin of life and human civilization. Bercovici marries humor and legitimate scientific intrigue, rocketing readers across nearly fourteen billion years and making connections between the essential theories that give us our current understanding of topics as varied as particle physics, plate tectonics, and photosynthesis. Bercovici s unique literary endeavor is a treasure trove of real, compelling science and fascinating history, providing both science lovers and complete neophytes with an unforgettable introduction to the fields of cosmology, geology, climate science, human evolution, and more.
